Parent project to help patients with Duchenne/Becker myodystrophy

We support #RareDiseaseDay

Our event

«We share about this day in social networks!»

This February, we will share information about the Day of Rare Diseases in our groups on social networks.

News, articles, stories with translation into Russian from the site rarediseaseday.org with links to the source.

In our groups, our DMD patients will tell their stories under the hashtag #RareDiseaseDay

There are many caring people in Russia who are ready to support the Day of Rare Diseases.
