

CENTRE-ALLIANCE

Encadrons les enfants affectés par une Maladie Rare

Nurture Children affected by a Rare Disease

Proposed EVENTS for Rare Disease Day

Every year, thousands of events are organised around the world during the month of February to mark the occasion of Rare Disease Day. Patient organisations, healthcare professionals, researchers, policymakers and other members of the rare disease community organise Rare Disease Day events.

In light of the global pandemic in 2021, “Centre-Alliance” want to rally enough voices by respecting all information, advice and restrictions again coronavirus.

The ways to continue to raise awareness in Rwanda, we propose to:

- Host an online meeting, workshop or conference
- Invite policy makers to a political event or present a manifesto to your local authorities
- Share the official video and materials on social media!
- Illuminate a building! (Convention-Center, KCT, ...)

Thanks for your support.
